Re: Semi-annual Startup, Shutdown and Malfunction Report
Winnebago Landfill
CAAPP Permit No. 99020102; Facility ID No. 201801AAF
Reporting Period: January 1, 2009 through June 30, 2009

Winnebago Reclamation Service respectfully submits this report in accordance with 40 CFR 63.10(d)(5)(i) and CAAPP Permit Condition 5.2.5. The Winnebago Landfill is subject to the National Emissions Standards for Hazardous Air Pollutants for Municipal Solid Waste Landfills, being 40 CFR Part 63 Subparts A and AAAA (NESHAP).

In accordance with 40 CFR §63.10(d)(5) this semi-annual report contains information pertaining to the facility's compliance with the procedures in their SSM Plan during SSM events. This report covers the reporting period January 1, 2009 through June 30, 2009.

Winnebago Landfill operates a landfill gas treatment system and two backup open flares as the control device for the landfill gas. Treated landfill gas is used at the Winnebago Energy Center for generating electricity. Open flares operate when treatment system is down for maintenance or malfunction. Winnebago Landfill maintains operational records of the open flares and treatment system.

For the reporting period, thirty nine (39) start-up, twenty (20) shutdown and nineteen (19) malfunction events occurred. During the reporting period, the 19 malfunction events did not cause an applicable limitation to be exceeded. The actions taken at the facility for all SSM events during the reporting period were consistent with the procedures listed in the SSM Plan at the facility. Records are maintained at the facility and available for review. Table 1 contains the date, duration, and description of all malfunction events for the reporting period.

During the reporting period January 1, 2009 through June 30, 2009, there were no revisions made to the SSM Plan at the facility.
